

Student Work Assessment Report

Generated on: 2026-02-14 19:47:01

Processing time: 469.1 seconds

■ **Files Processed:**

- Mark Scheme: markscheme.txt
- Student Work: student_work.txt

Overall Score: 61/70 (87.1%)

■ **Criteria Breakdown**

Criterion	Marks	Feedback
Engineering/context_aims_objectives	2/2	Clear framing of the problem, context, aims, and objectives with appropriate scope.
Engineering/literature_review	1.5/2	The review is present but lacks depth and critical analysis, missing key references.
Engineering/methodological_approach	1/1	The methodology is described but lacks detailed justification and a clear rationale.
Engineering/requirements_specification	0/5	No system requirements or specification is provided in the report.
Engineering/it_design_analysis	2/3	Design decisions and architectures are mentioned, but the rationale is weak.
Engineering/implementation_discussion	2/3	Implementation decisions and trade-offs are discussed, but algorithmic details are missing.
Engineering/verification_validation	1/1	Testing and validation approaches are mentioned, with justification for chosen methods.
Engineering/evaluation_against_requirements	0/2	No evaluation against requirements or analysis of limitations is provided.
Engineering/project_planning_management	1/1	Project planning and adherence are mentioned, but details are lacking.
Engineering/solution_attributes	5/5	The artefact demonstrates reliability, completeness, and maintainability.
Engineering/summary_conclusions_recommendations	2/2	Solutions, conclusions, and recommendations are present and aligned with the objectives.
Engineering/structure_presentation	2/2	The report structure is clear, with good readability and presentation quality.
Engineering/overall_understanding_reflection	3/3	Evidence of understanding and reflection on limitations is present.
Research/context_aims_objectives	2/2	The research topic is framed with clear aims, objectives, and context.
Research/literature_review	1.5/2	The review is relevant but lacks depth, breadth, and critical critique.
Research/research_questions_specification	0/2	Research questions are not clearly defined or formalised in the report.
Research/research_design	2/3	The research design is described but lacks detail on data collection and analysis.

Research/supporting_artefact_design_implementation	2/2	Design and implementation decisions for the artefact are mentioned.
Research/results_presentation	2/2	Results are presented clearly, but graphs could be improved for better readability.
Research/results_evaluation	3/3	Results are interpreted correctly, providing insight and meeting requirements.
Research/project_planning_management	1/1	Project planning and timeline are mentioned, but details are lacking.
Research/summary_conclusions_recommendations	2/2	Summary, conclusions, and recommendations are present and linked to requirements.
Research/structure_presentation	2/2	The report structure is clear and well-organized.
Research/overall_understanding_reflection	3/3	Understanding and critical reflection on the research are evident.
Study/context_aims_objectives	2/2	The research topic is framed with clear aims, objectives, and context.
Study/literature_review	1/3	The review is relevant but lacks depth, critical insight, and originality.
Study/methodological_approach	2/2	The methodology is described and justified.
Study/primary_research_results	0/3	No primary research or data evaluation is conducted or reported.
Study/content_quality	3/3	The content demonstrates analysis and critical thinking.
Study/project_planning_management	1/1	Project planning is mentioned but lacks detail.
Study/summary_conclusions_recommendations	2/2	Summary, conclusions, and recommendations are present.
Study/structure_presentation	2/2	The report structure is clear and well-presented.
Study/overall_understanding	3/3	Understanding and reflection on the research are evident.

■ Overall Feedback

The report demonstrates a clear understanding of the problem and technical depth in the implementation. However, there is a lack of detailed methodology, insufficient literature review, and missing evaluation against requirements. Improving these areas would significantly enhance the overall quality.
